Practicing Mindfulness & Compassion

Mindfulness and Compassion: Similarities and Differences

Kristin Neff, Ph.D.
University of Texas, Austin
<http://www.self-compassion.org/>

Practicing Mindfulness & Compassion

What is Compassion?

Concern for the alleviation of suffering
of sentient beings (self and others)

Practicing Mindfulness & Compassion

Three Components of Compassion for Self or Others

Practicing Mindfulness & Compassion

Mindfulness

- Requires noticing the suffering of self/others without avoidance or aversion

Practicing Mindfulness & Compassion

Kindness

- Treating self/others with care and understanding
- Involves active soothing and comforting

Practicing Mindfulness & Compassion

Common Humanity

- Seeing the experience of self/others as part of larger human experience

What is the Difference Between Mindfulness and Compassion?

Depends on how you define mindfulness!

Common Definition of Mindfulness:

Paying attention to present moment
experience without judgment

Practicing Mindfulness & Compassion

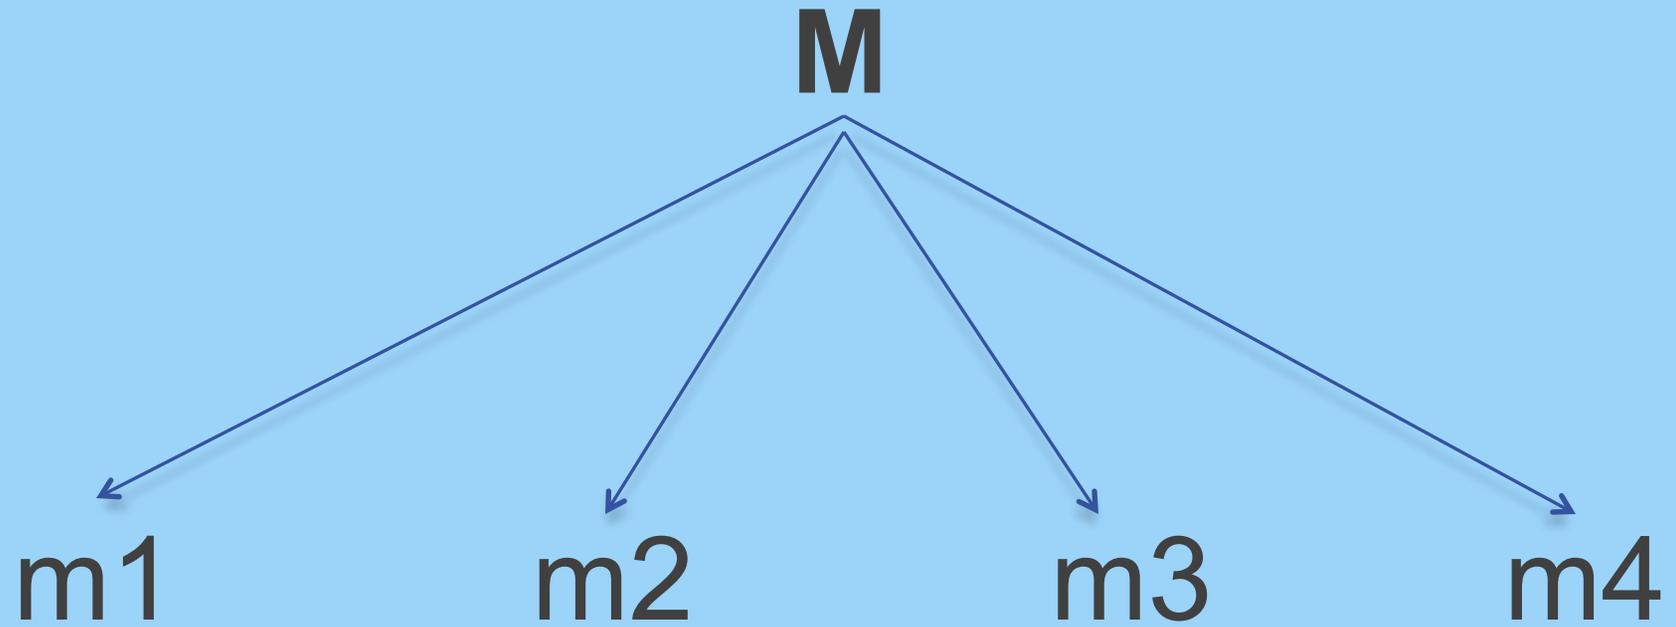

Can be used as umbrella term for the dharma
or contemplative practice more generally

Practicing Mindfulness & Compassion

Practicing Mindfulness & Compassion

Four Aspects of M (Umbrella of Mindfulness)

- m1: Paying attention to experience in the present moment

Four Aspects of M (Umbrella of Mindfulness)

- m1: Paying attention to experience in the present moment
- m2: Relating to experience without judgment or resistance (mindfulness = m1/m2)

Four Aspects of M (Umbrella of Mindfulness)

- m1: Paying attention to experience in the present moment
- m2: Relating to experience without judgment or resistance (mindfulness = m1/m2)
- m3: Relating to the experiencer with the desire to alleviate suffering (compassion)

Four Aspects of M (Umbrella of Mindfulness)

- m1: Paying attention to experience in the present moment
- m2: Relating to experience without judgment or resistance (mindfulness = m1/m2)
- m3: Relating to the experiencer with the desire to alleviate suffering (compassion)
- m4: Understanding the nature of both experience and the experiencer (wisdom)

Four Aspects of M (Umbrella of Mindfulness)

- m1: Paying attention to experience in the present moment
- m2: Relating to experience without judgment or resistance (mindfulness = m1/m2)
- m3: Relating to the experiencer with the desire to alleviate suffering (compassion)
- m4: Understanding the nature of both experience and the experiencer (wisdom)
- Four aspects are cumulative and build on each other $m1 < m2 < m3 < m4$

Four Aspects of M (Umbrella of Mindfulness)

- It is important to understand differences between m's for research

Four Aspects of M (Umbrella of Mindfulness)

- It is important to understand differences between m's for research
 - Self-report measures
 - Physiological differences
 - Brain function

Four Aspects of M (Umbrella of Mindfulness)

- It is important to understand differences between m's for training

Four Aspects of M (Umbrella of Mindfulness)

- It is important to understand differences between m's for training
 - All four aspects may spontaneously unfold, especially among long-term practitioners

Four Aspects of M (Umbrella of Mindfulness)

- It is important to understand differences between m's for training
 - All four aspects may spontaneously unfold
 - More direct training is sometimes needed, and there are specific practices for each “m”

Four aspects of M (Umbrella of Mindfulness)

- It is important to understand differences between m's for training
 - All four aspects may spontaneously unfold, especially among long-term practitioners
 - More direct training is sometimes needed, and there are specific practices for each “m”
 - Training in compassion for oneself probably most needed

Four aspects of M (Umbrella of Mindfulness)

- It is important to understand differences between m's for training
 - All four aspects may spontaneously unfold, especially among long-term practitioners
 - More direct training is sometimes needed, and there are specific practices for each “m”
 - Training in compassion for oneself probably most needed
 - ❖ MBSR and MBCT focus mainly on teaching m1/m2, teach self-compassion implicitly

Mindful Self-Compassion Program

(created by Chris Germer and Kristin Neff)

- Modeled on MBSR, designed as a sister program
- Focuses primarily on teaching self-compassion

Mindful Self-Compassion Program

- Modeled on MBSR, designed as a sister program
- Focuses primarily on teaching self-compassion
- Appears to raise self-compassion 2 to 3 times more than MBSR, 4 to 5 times more than MBCT
 - Gains maintained for at least a year

Mindful Self-Compassion Program

- Modeled on MBSR, designed as a sister program
- Focuses primarily on teaching self-compassion
- Appears to raise self-compassion 2 to 3 times more than MBSR, 4 to 5 times more than MBCT
 - Gains maintained for at least a year
- For most, prior mindfulness training probably best, some may need self-compassion first

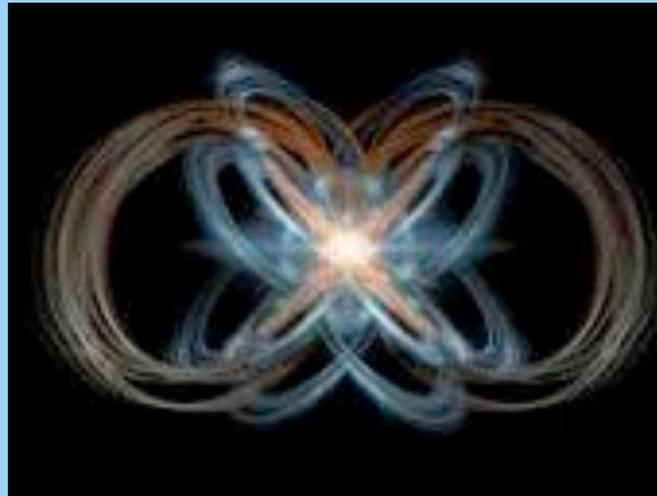

Paradox of Mindfulness and Self-Compassion

- Mindfulness (m1/m2) accepts painful **experience** without resistance, “being” with things as they are
- Compassion (m3) wishes the **experiencer** to be free from suffering, active self-soothing

Practicing Mindfulness & Compassion

Paradox of Mindfulness and Self-Compassion

We give ourselves compassion not to feel better
but because we feel pain

Practicing Mindfulness & Compassion

Paradox of Mindfulness and Self-Compassion

Self-compassion provides the emotional safety needed to mindfully open to our pain

Practicing Mindfulness & Compassion

Mindfulness and Compassion: A Beautiful Dance

Practicing Mindfulness & Compassion

mindful
taking time for what matters

Practicing Mindfulness & Compassion

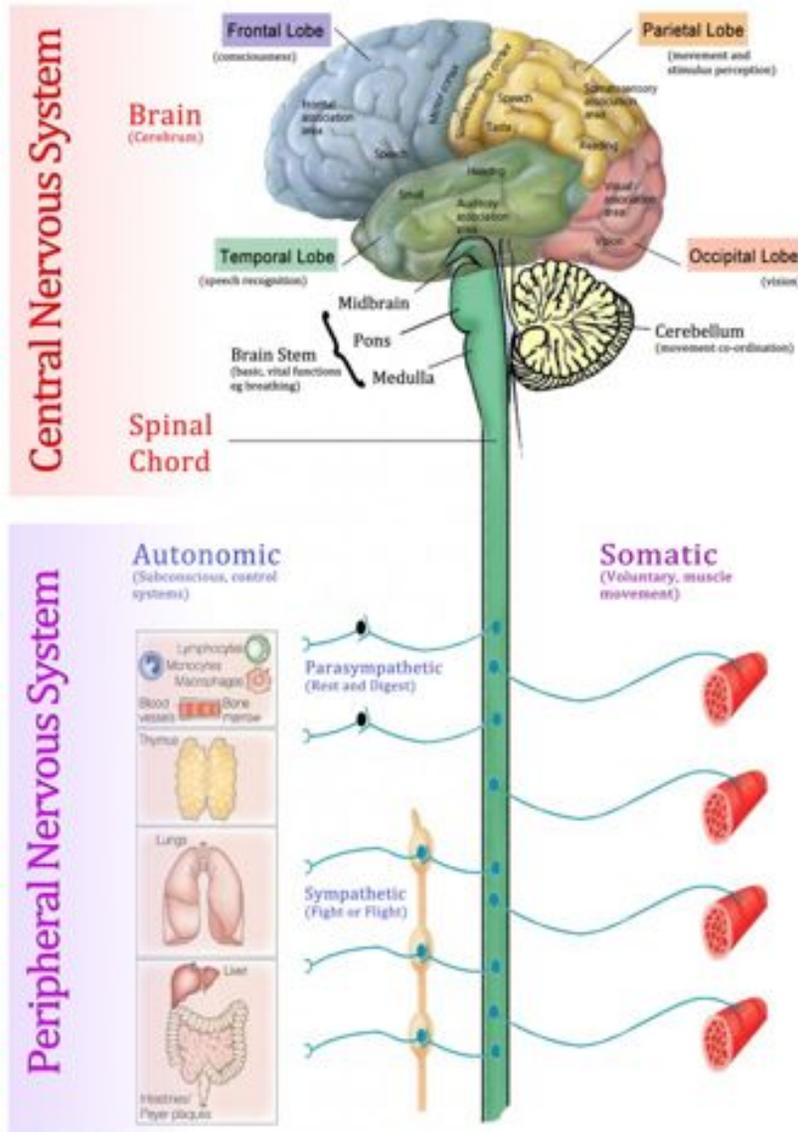

The Biological Landscape of Mindfulness & Compassion

Emiliana Simon-Thomas, Ph.D.
Science Director, Greater Good Science Center
University of California, Berkeley

Practicing Mindfulness & Compassion

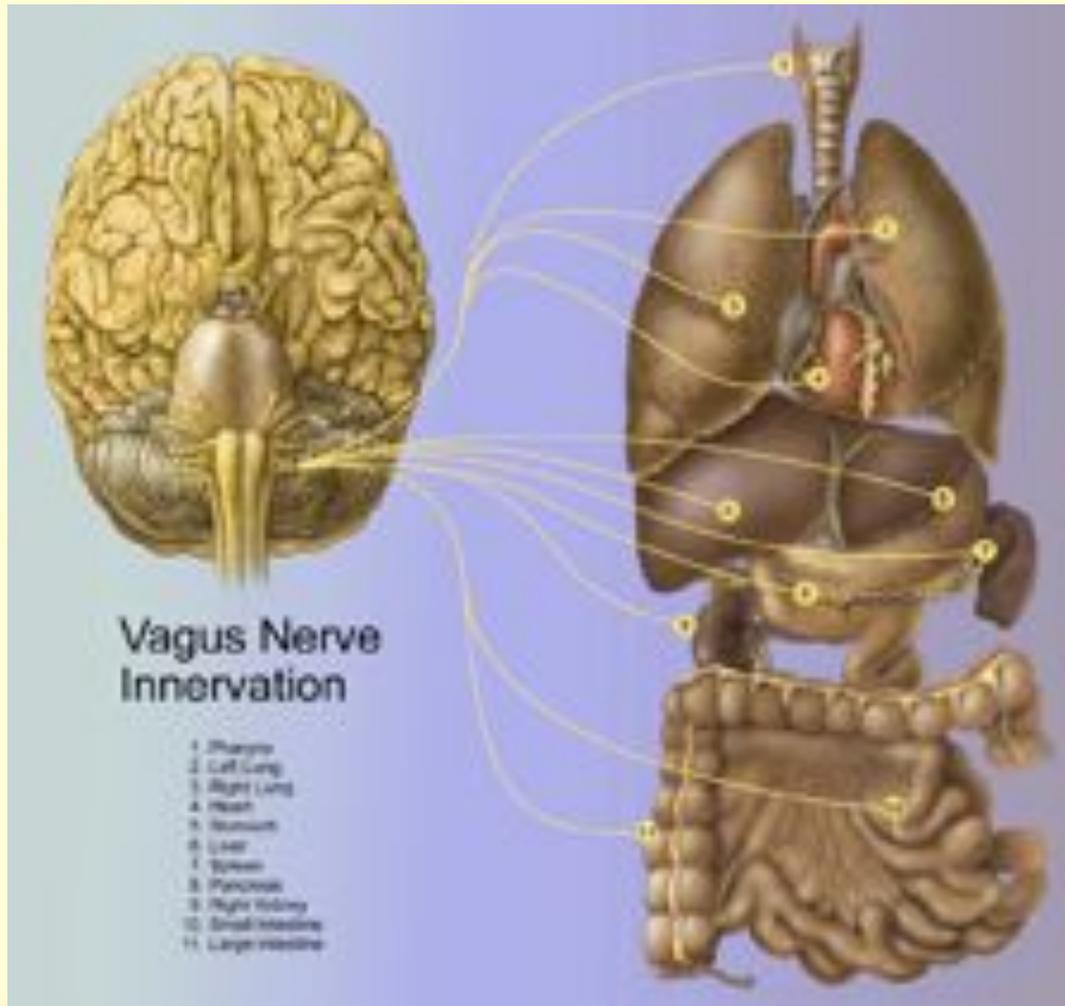

The Nervous System

Practicing Mindfulness & Compassion

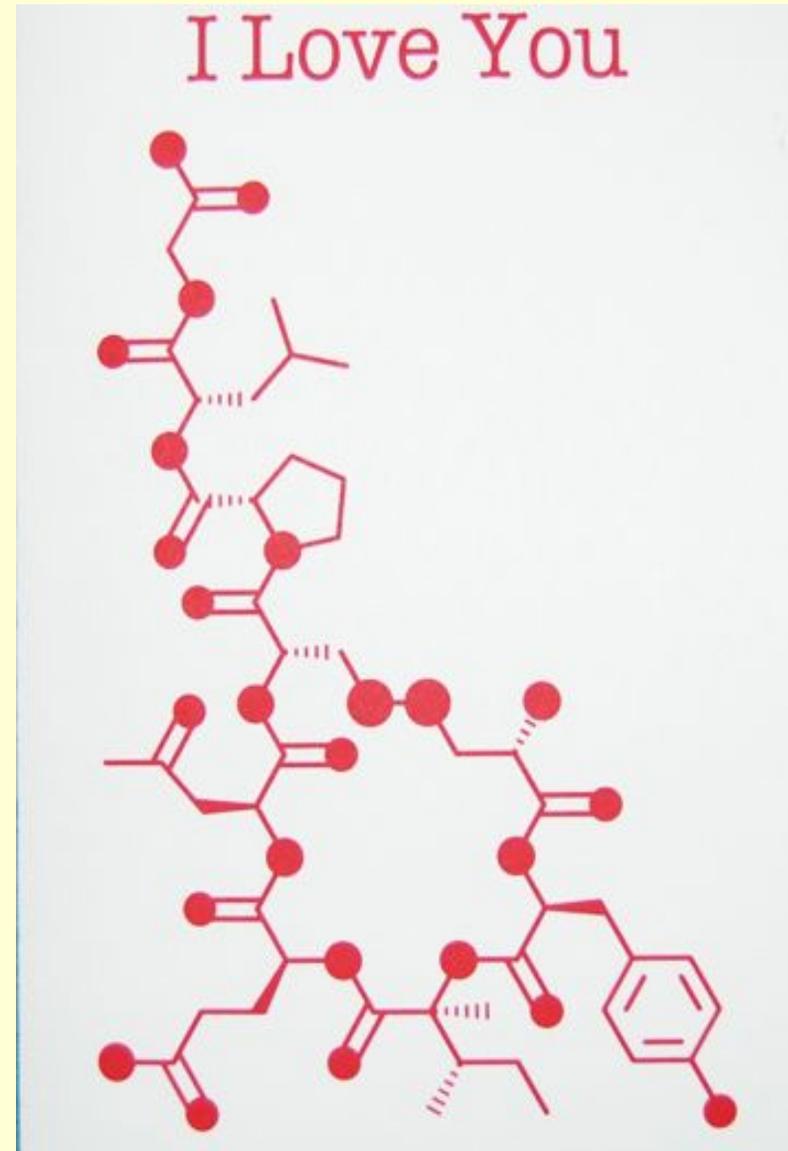

The Vagus Nerve (m2/m3)

- PNS influence on heart rate – slows beat down during outbreath
- Associated with affiliation, tend & befriend, general positive emotional tone
- Sensitive to safety

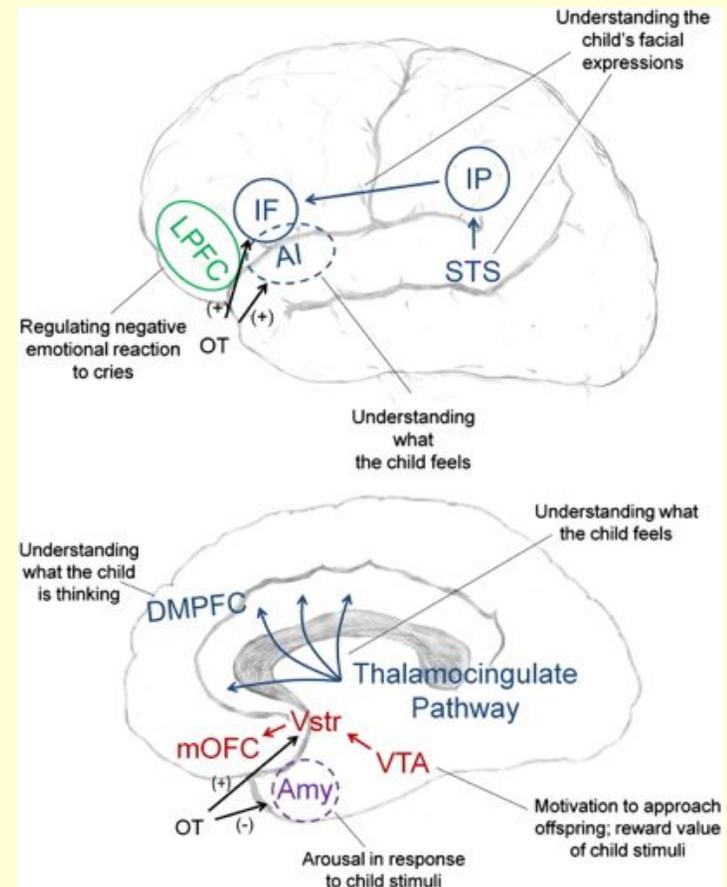

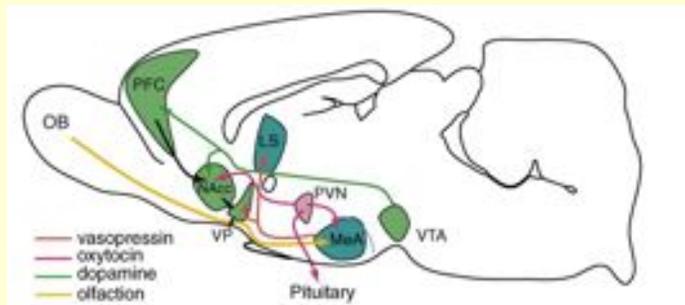

Oxytocin (m2/m3)

- Supports caretaking/nurturance, affection, social bonding (esp. long term)
- Promotes trust

The Brain: Hypothalamic-Midbrain Care/Nurturance Circuitry (m3)

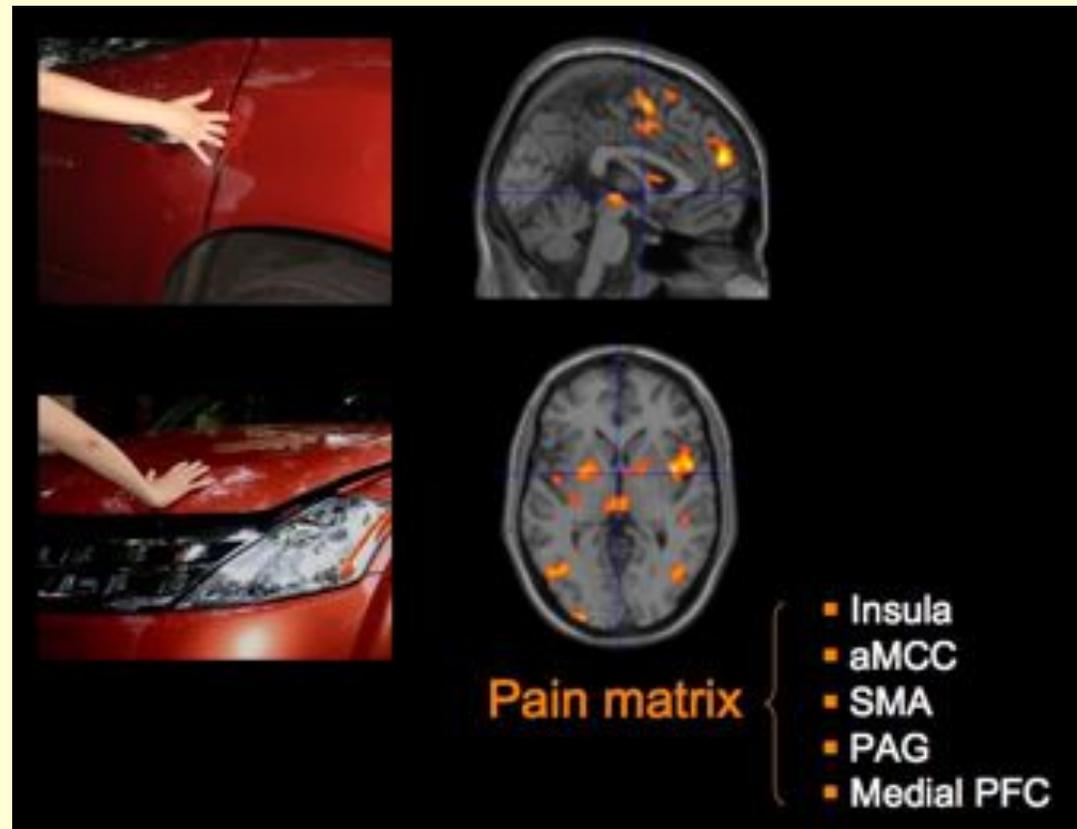

- Supports parental approach care/nurturance behaviors
- Sensitive to safety (emergent) vs. threat (quashed)

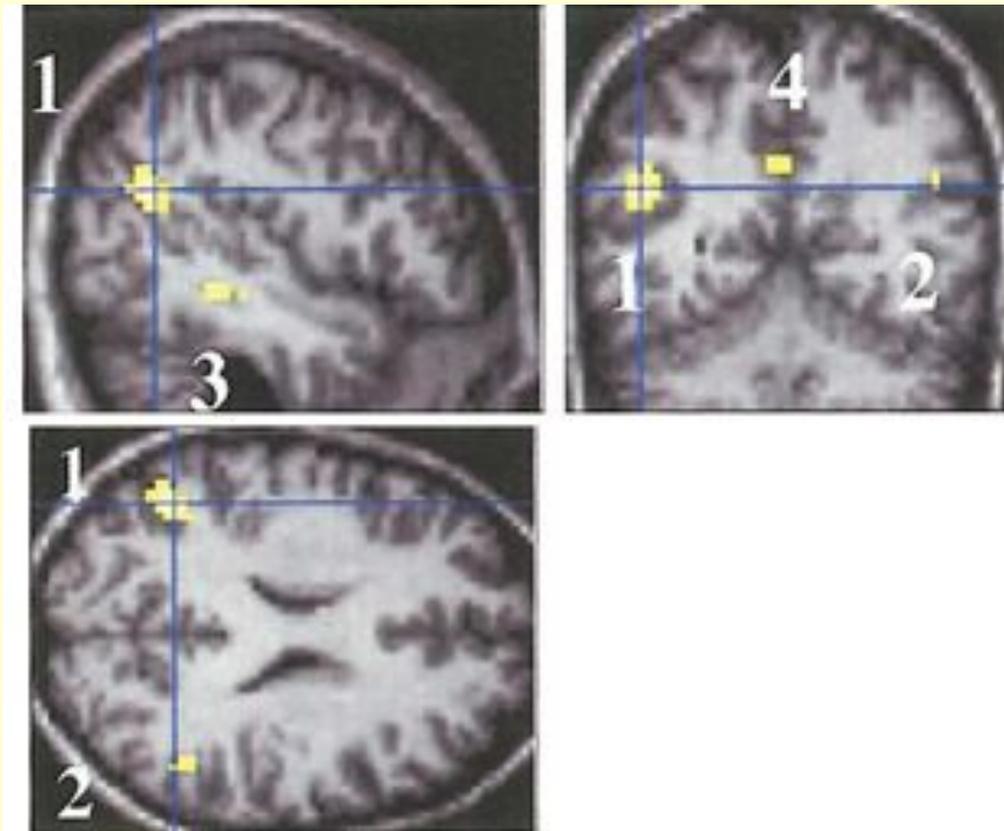

Practicing Mindfulness & Compassion

The Brain: Insula & Midline Shared Circuitry (m3/m4)

- Enables emotional resonance
- Is a catalyst for appraisals & attributions

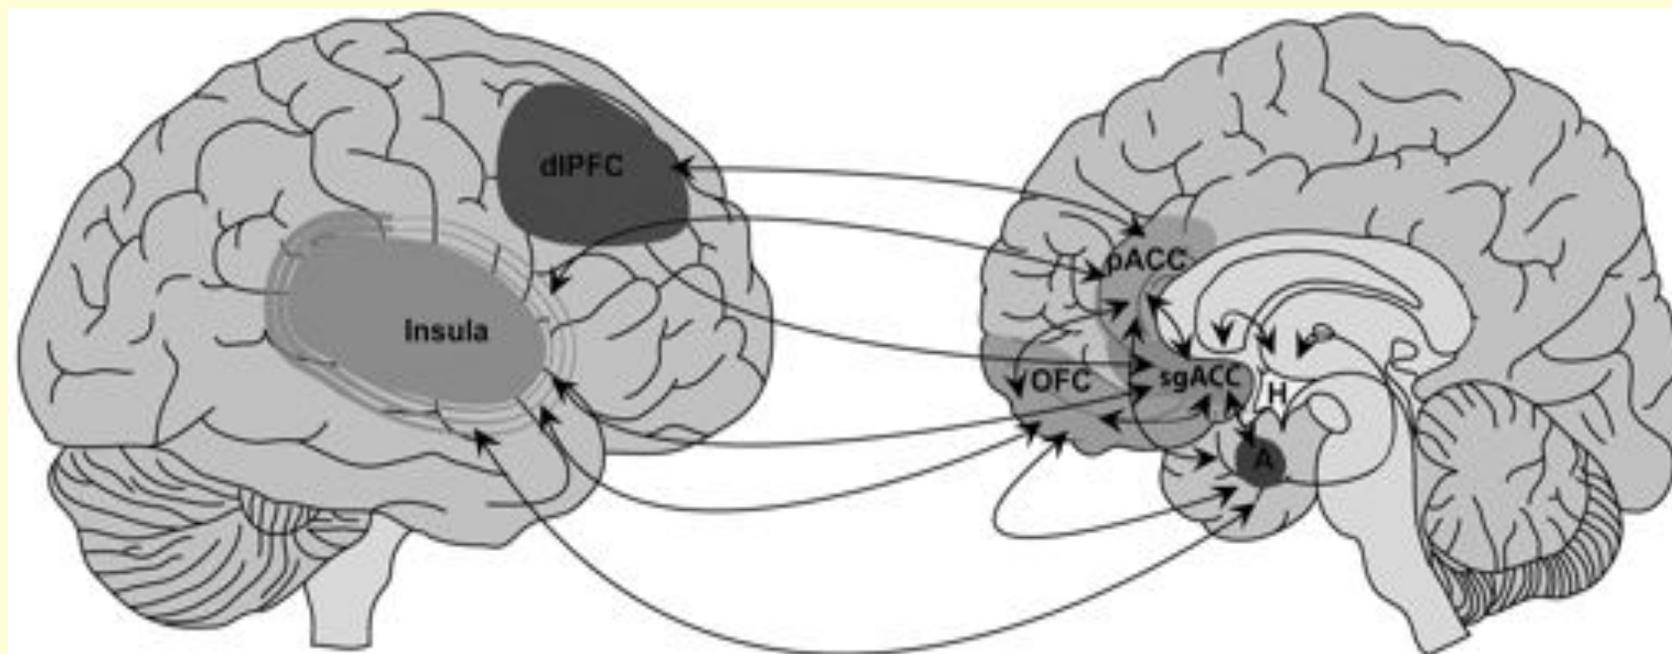

The Brain: Temporal Parietal Junction & Social Emotional Expertise (m3/m4)

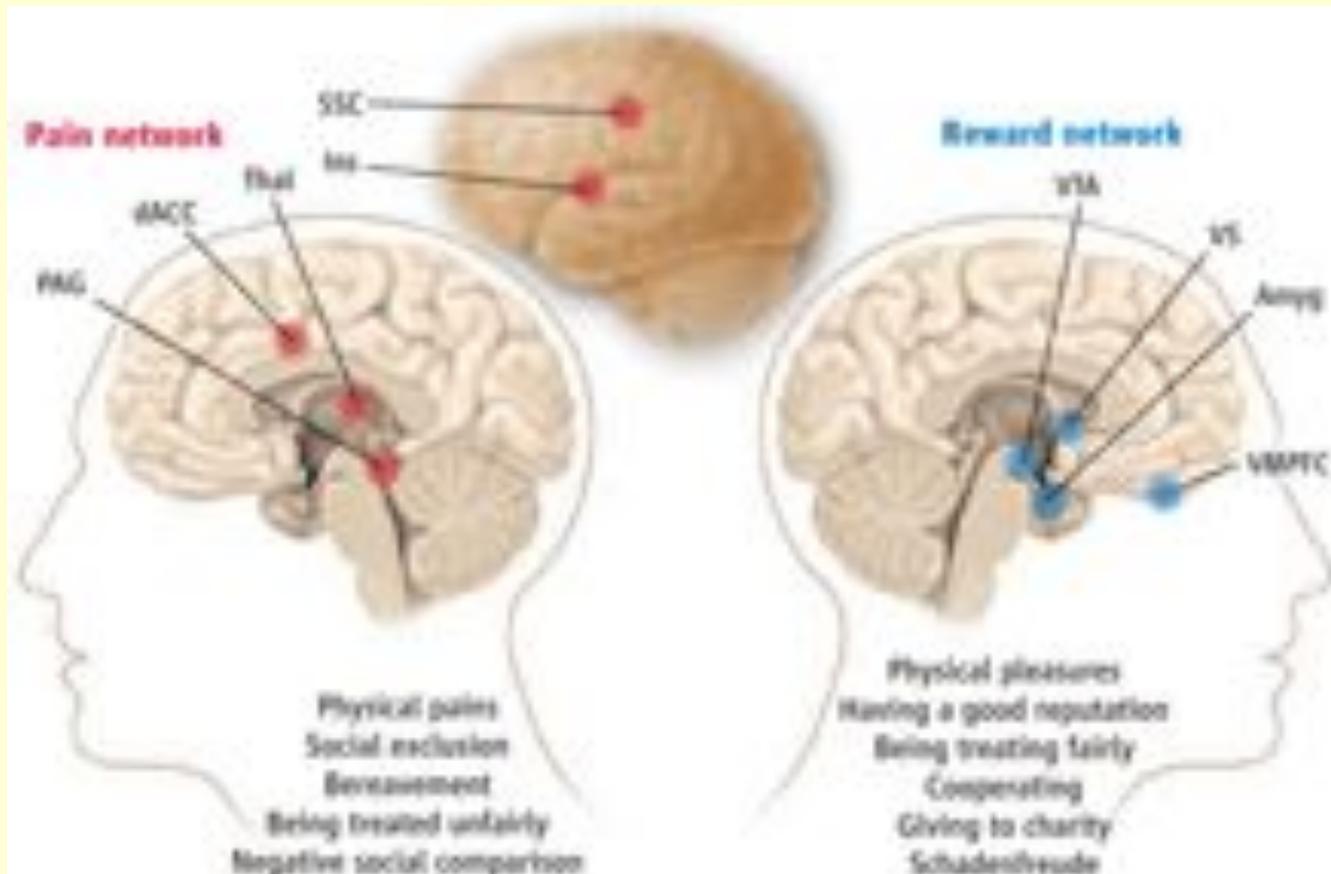

- Represents meaning of emotion signals
- Enables 'seeing from their point of view'

The Brain: The Prefrontal Cortex & Attention/Attunement/Awareness (m1/m2)

- Harnesses/channels 'monkey mind'
- Enables efficient recovery

The Brain: Mesolimbic Rewards & Amygdala Fear/Vigilance (m2)

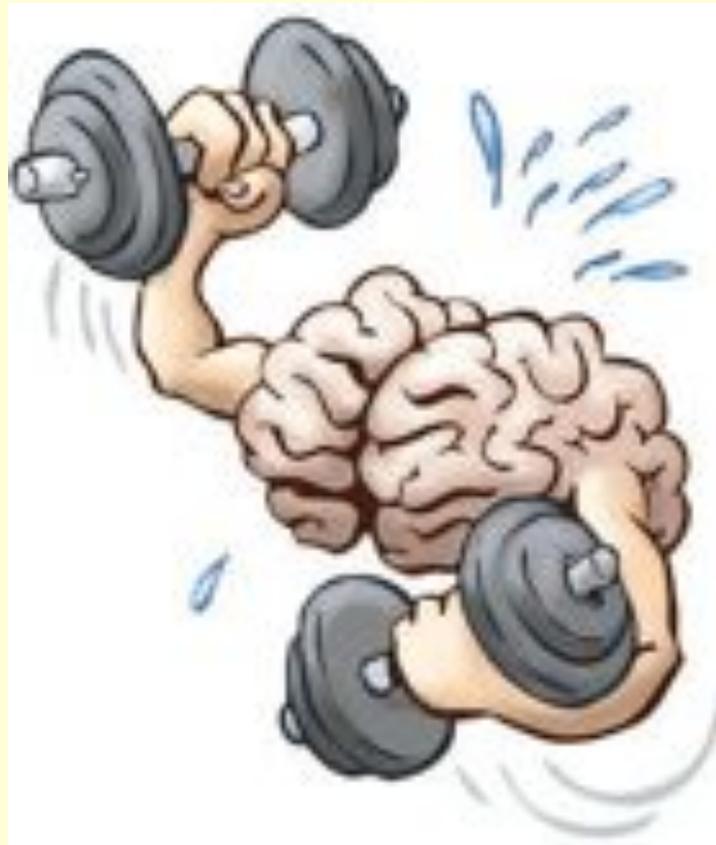

Practicing Mindfulness & Compassion

A Biological Profile of m4: Compassionate Mindfulness

- ↑ Vagal Tone & autonomic “flexibility”
- ↑ Oxytocin “Tone”
- ↑ Hypothalamic-midbrain social bonding “Tone”
- ↑ Frontal lobe “flexibility”
- ↑ Connections between reward & social engagement/
expertise pathways

- ↓ Connections between fear/vigilance & social engagement/
expertise pathways
- ↓ Overregulation of attunement/emotion suppression

Thanks!

Practicing Mindfulness & Compassion

Compassion Focused Therapy

Paul Gilbert PhD, FBPSS, OBE
Mental Health Research Unit, Kingsway Hospital Derby
www.compassionatemind.co.uk
www.compassionatewellbeing.com

Practicing Mindfulness & Compassion

The Two Psychologies of Compassion

Compassion can be defined in many ways:

As a **sensitivity** to the suffering of self and others with a deep **commitment to try to relieve and prevent** it

Two different Psychologies

- To approach, understand and (how to) engage with suffering
- To work to alleviate and prevent suffering –nurturing

Each more complex than might at first seem

Compassion Focused Therapy: A Social Mentality

**Caring/Helping
Giving**

**Specific Competencies
e.g., attention empathy**

Facilitators vs Inhibitors

**Care/Help Seeking/
Receiving**

**Specific Competencies
e.g., openness responsive**

Facilitators vs Inhibitors

Practicing Mindfulness & Compassion

Compassion as Flow

Different practices for each

Other → Self

Self → Other

Self → Self

Evidence that *intentionally* practicing each of these can have impacts on mental states and social behaviour

Why do we need Compassion? Life is Hard

Practicing Mindfulness & Compassion

Compassion Begins With a *Reality Check*

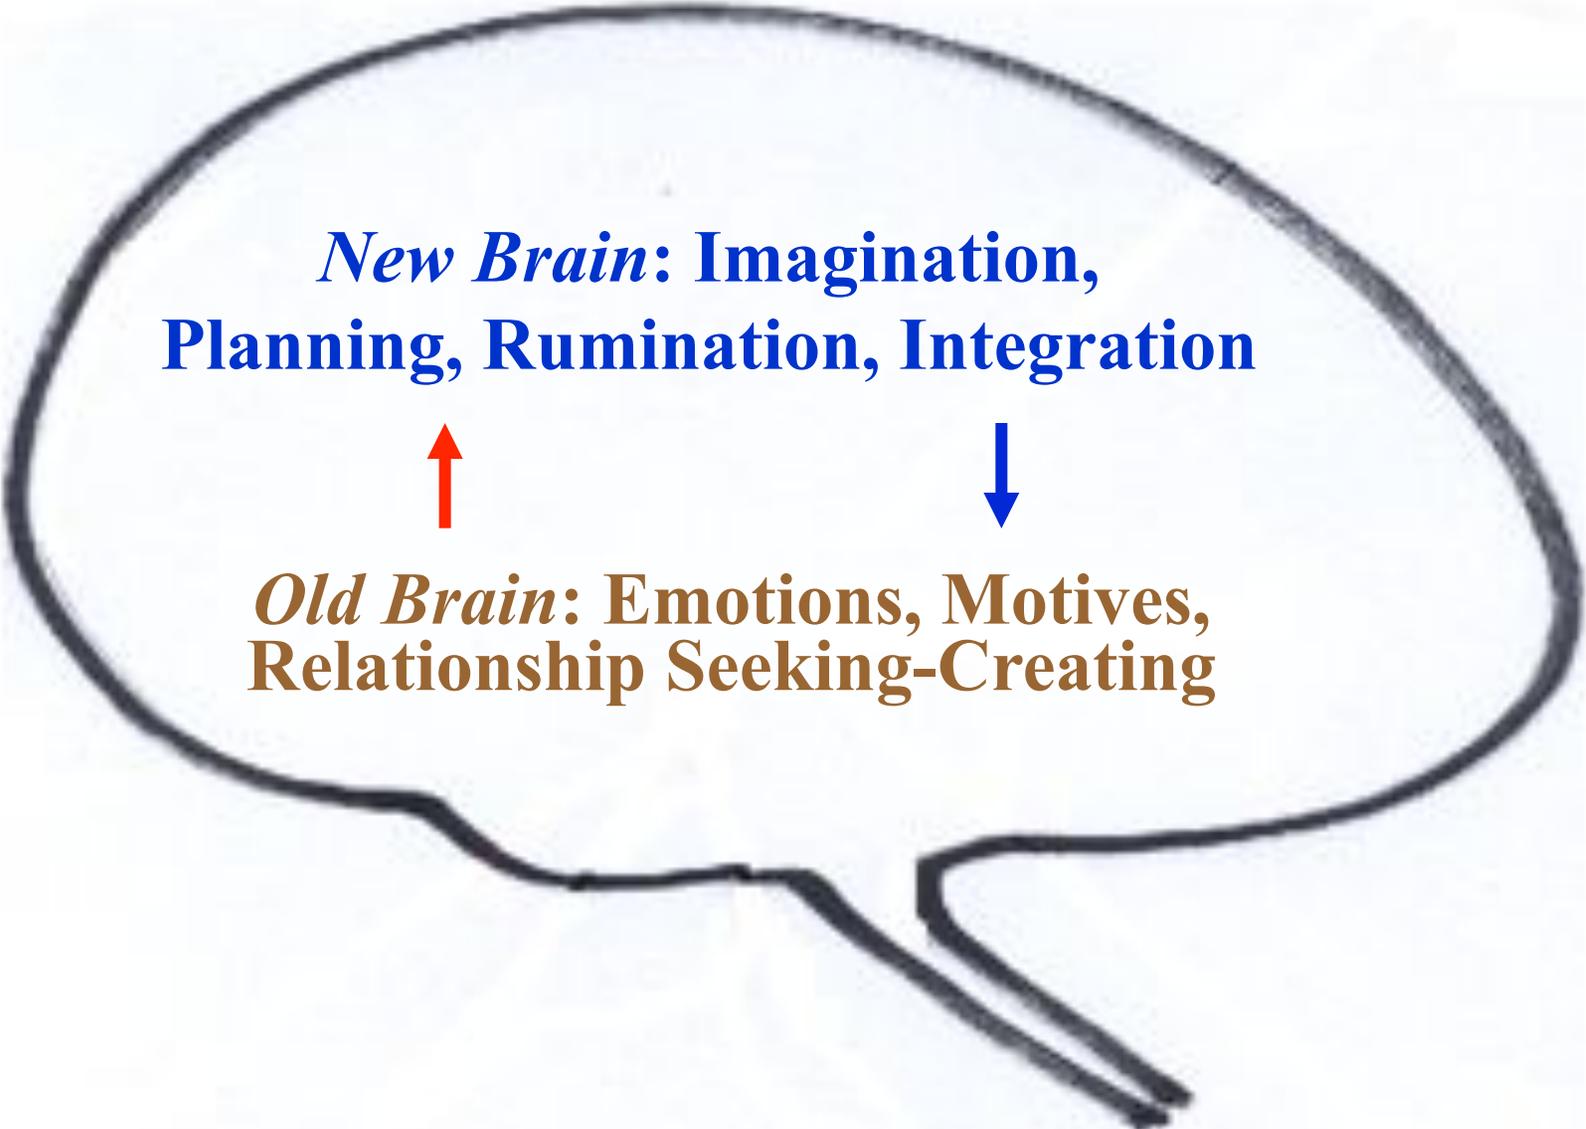

- We have gene-built evolved brains
- We all are born, grow decay and die – and are susceptible to disease and injury
- We are socially shaped – from our gene expressions to our sense of self

Compassion: Challenges of Our Evolved Brain and the Distressed Mind

Practicing Mindfulness & Compassion

Practicing Mindfulness & Compassion

Practicing Mindfulness & Compassion

Conclusion

Humans are capable of wonderful things, but also terrible things. Very mixed mind – many seeds

Our minds are really a mixed range of potential motives, ways of thinking and behaving – and we easily dissociate one state of mind from another

By improving our understanding of the nature of compassion, it's facilitators and inhibitors, both as a giver and receiver, we may be better placed to cultivate the good in us. This could be the focus for the next generation

Practicing Mindfulness & Compassion

Mindfulness Defined

“The awareness that arises out of intentionally paying attention in an open, kind and discerning way.”

Shapiro & Carlson, 2006

Three Core Elements of Mindfulness

Practicing Mindfulness & Compassion

Intention

Your intentions set the stage for what is possible. They remind you from moment to moment of why you are practicing...I used to think meditation practice was so powerful...that as long as you did it at all, you would see growth and change. But time has taught me that some kind of personal vision is also necessary.

What is your intention for being here?

Practicing Mindfulness & Compassion

“The most important thing is to
remember the most important thing”

Suzuki Roshi

Practicing Mindfulness & Compassion

Attention

- Present Moment Awareness
- Monkey mind
- Mindfulness practice tames and stabilizes the mind so we can see clearly.

“An unstable mind is like an unstable camera; we get a fuzzy picture.” Christopher Germer

Attitude

How we pay attention

Practicing Mindfulness & Compassion

Attitude

What we practice becomes stronger

Acceptance

Openness

Caring

Compassion

Practicing Mindfulness & Compassion

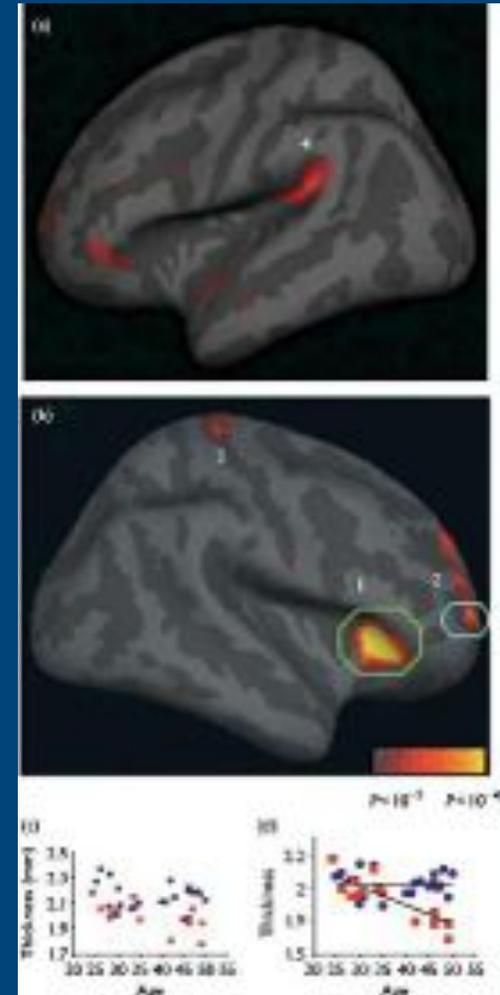

Neuroplasticity

Our repeated experience shapes our brain.

Mindfulness practice increases grey matter density in areas of the brain associated with learning, self-awareness, emotional intelligence, interoception and compassion. (Lazar, 2005; Britta Hölzel, 2011)

Cortical thickening correlated with experience: The more you practice the stronger the cortex. (Lazar, 2005)

Practicing Mindfulness & Compassion

Does Mindfulness Practice Increase Compassion for Self and Other?

Research demonstrates mindfulness training increases compassion for self and other in physicians, medical students, counseling psychology students, undergraduates, psychologists and other health care professionals.

Shapiro, Jazzeri, Goldin, 2012

Shapiro, Oman, et al, 2008

Shapiro, Brown, Biegel, 2007

Shapiro, Astin, et al, 2004

Shapiro, Schwartz, Bonner, 1998

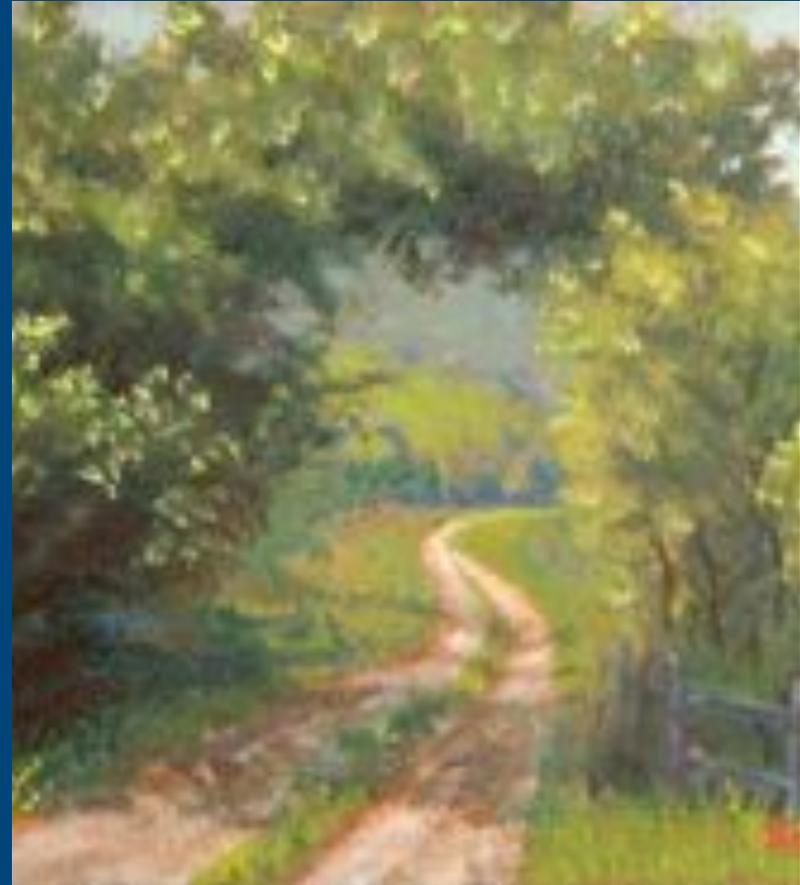

Practicing Mindfulness & Compassion

How Does Mindfulness Cultivate Compassion?

1. What we practice becomes stronger
2. Slowing down
3. Interdependence
4. Remembering our essential nature

1. What We Practice Becomes Stronger

Practicing Mindfulness & Compassion

2. Slowing Down

When we are hurried, stressed, scared we lose touch with our natural compassion. Mindfulness helps us slow down, see clearly and stay connected to our deepest values.

3. Mindfulness Helps Us See Our Interdependence

We are all cells in God's body

Practicing Mindfulness & Compassion

4. Remembering Our Essential Nature

*A clinical example:
Mindfulness for PTSD.*

*Learning to welcome all
of our experience with
compassion...even the
seemingly unforgiveable.*

Practicing Mindfulness & Compassion

St. Francis and the Sow

Galway Kinnell

The bud
stands for all things
even those things that don't flower,
for everything flowers,
from within, of self_blessing;
though sometimes it is necessary
to reteach a thing its loveliness,
to put a hand on the brow of the flower
and retell it in words and in touch
it is lovely
until it flowers again from within,
of self_blessing .

Presence of Heart

Practicing Mindfulness & Compassion

If you can sit quietly after difficult news...

If in financial downturns you remain perfectly calm...

If you see your neighbors travel to favorite places without a tinge of jealousy...

If you can happily eat whatever is put on your plate...

If you can love everyone around you unconditionally...

If you can always find contentment just where you are...

You are probably...

Practicing Mindfulness & Compassion

A Dog!

Practicing Mindfulness & Compassion

Mindfulness-Based Childbirth & Parenting (MBCP)

Training the Mind, Body, and Heart
for Childbirth and Beyond

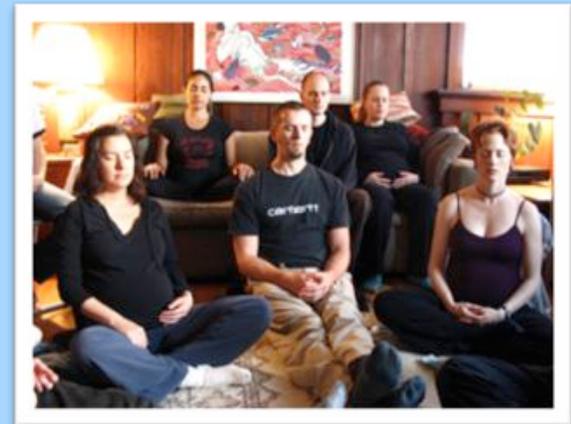

Nancy Bardacke, RN, CNM, MA
UCSF Osher Center for Integrative Medicine
UCSF School of Nursing
www.mindfulbirthing.org

Practicing Mindfulness & Compassion

A Brief History

- ❖ 1994 -- MBSR
- ❖ 1998 -- Formal adaptation of MBSR into MBCP (in my living room)
- ❖ 2007 -- UCSF Osher Center for Integrative Medicine
- ❖ 70 classes in 15 years
- ❖ More than 1,300 expectant parents

Practicing Mindfulness & Compassion

Why Bring Mindfulness to Expectant Families?

- ❖ *Pregnancy* is stressful
- ❖ *Childbirth* is stressful
- ❖ *Parenting* is stressful
- ❖ *Being born* is stressful!

“Gestation is the time when our nervous systems are under construction and being wired for equanimity and stability or for hypersensitivity and vulnerability to the stressors of the world outside the womb...”

Robin Karr-Morse with Meredith S. Wiley

*Scared Sick: The Role of
Childhood Trauma in Adult Disease*

Practicing Mindfulness & Compassion

Can Mindfulness Bring Benefit?

Practicing Mindfulness & Compassion

Perhaps...

- ❖ 9 week course x 3 hours
- ❖ Daily home practice: 30 min/day
6 days/week
- ❖ Silent daylong retreat
- ❖ Reunion after birth

Practicing Mindfulness & Compassion

Mindfulness Practices

- ❖ Body Scan
- ❖ Sitting Meditation
- ❖ Yoga
- ❖ Walking Meditation
- ❖ Loving-kindness Practice
- ❖ Mindfulness in daily life

Practicing Mindfulness & Compassion

MBCP Practices

- ❖ Mindful pain practices
- ❖ Inquiry practice: fear
- ❖ Mindful partner communication
- ❖ Thread of mindful parenting
- ❖ Community

Practicing Mindfulness & Compassion

MBCP Pilot Observational Study

Duncan and Bardacke, *Journal of Child & Family Studies* (2010)

INCREASED:

Positive emotions

Mindfulness

~attention/awareness

~non-judging

~non-reactivity

DECREASED:

Negative emotions

Depressive mood

Pregnancy anxiety

Practicing Mindfulness & Compassion

Preliminary Qualitative Findings

- ❖ Increased confidence and decreased stress/fear post MBCP
- ❖ High use of mindfulness pain coping skills during childbirth
- ❖ Mindfulness sustained in the postpartum period
- ❖ Relationship benefits:
 - ❖ Attunement behaviors, increased couple intimacy
 - ❖ Common language, empathic connection
- ❖ Interrupt intergenerational patterns of suffering

The Heart of the Matter

Practicing Mindfulness & Compassion

Expanding MBCP

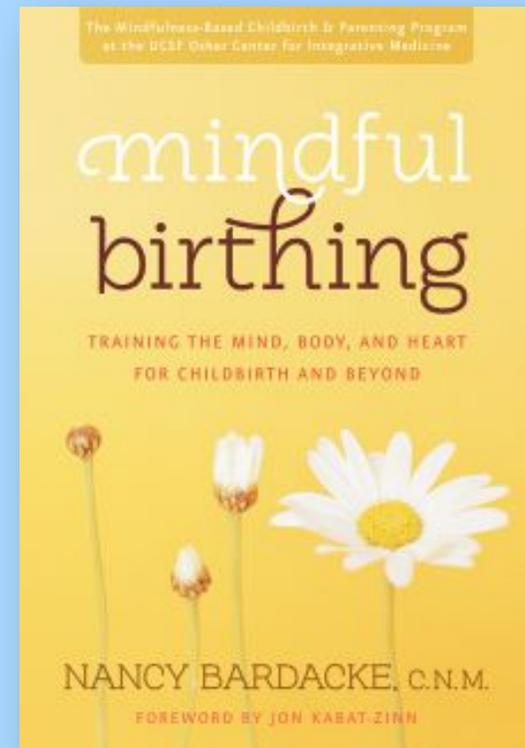

Centering Pregnancy with
Mindfulness Skills, SFGH

Practicing Mindfulness & Compassion

More expansion...

- ❖ Future Research
 - ❖ PEARLS: Labor related pain
 - ❖ OPAL: Survey of MBCP alumni ~N=500
 - ❖ International Collaborations: UK, the Netherlands, Sweden, Hong Kong
- ❖ Teacher Training / UCSD

It's not about the birth...

Mindful Lawyering: Peacemaking and Healing through Compassion

Rhonda V. Magee, J.D.

University of San Francisco School of Law

Practicing Mindfulness & Compassion

An Opening Practice: S.T.O.P.

Mindfulness is

being more fully alive

to the unrepeatable moments of our lives,

and acting from the wisdom that arises
from there.

Practicing Mindfulness & Compassion

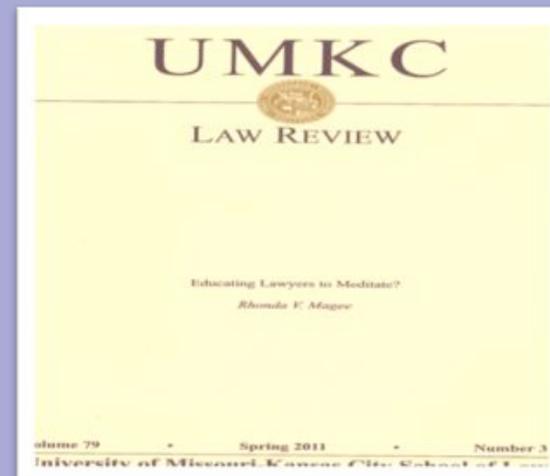

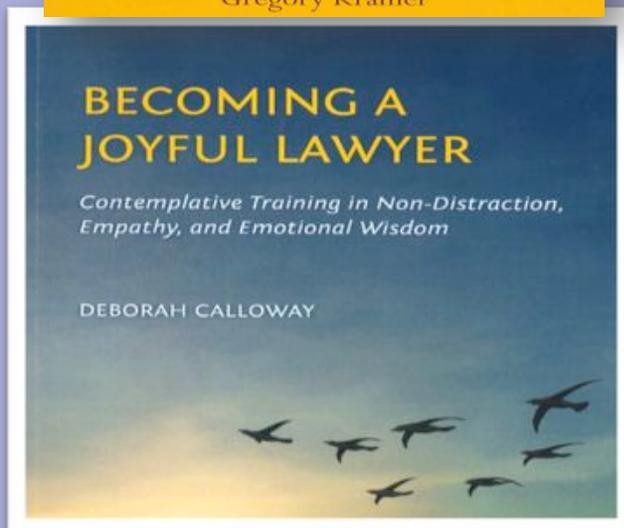

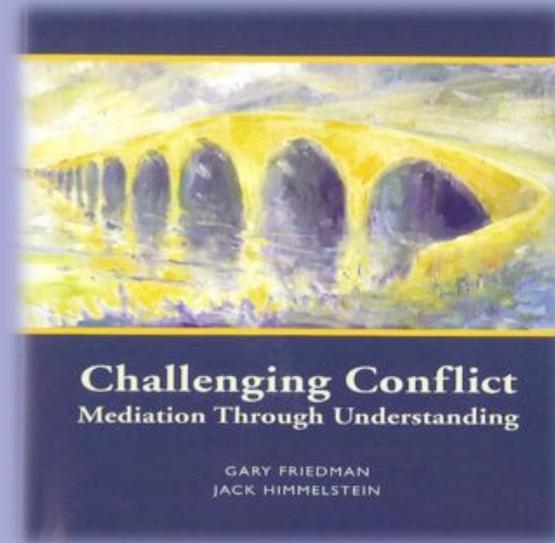

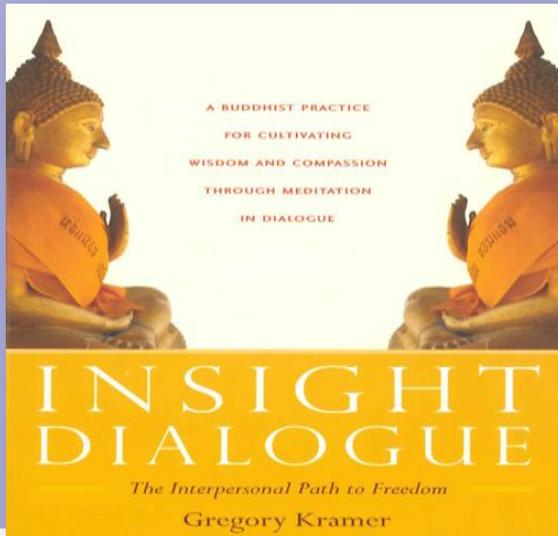

The Mindfulness Revolution

UNIVERSITY OF
SAN FRANCISCO

School of Law

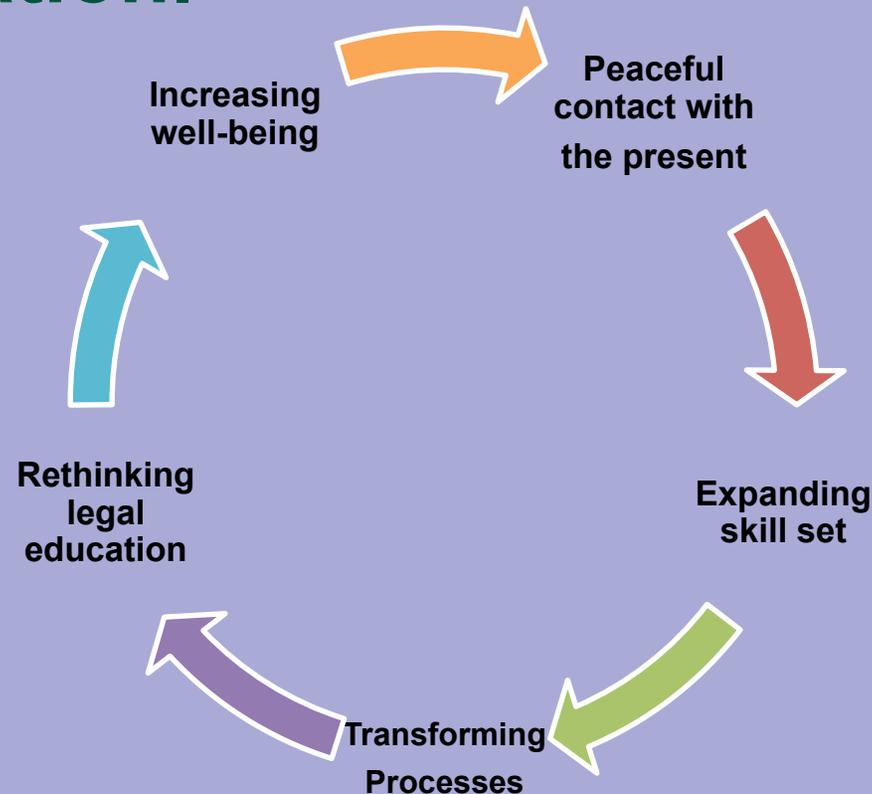

Practicing Mindfulness & Compassion

The Mindfulness Revolution: changing the “how” of conflict transformation.

Practicing Mindfulness & Compassion

It Means Opening Up the Law School Classroom....

...and bringing **the whole person** back in.

Practicing Mindfulness & Compassion

Mindful Lawyers are More Compassionate Lawyers.

The movement to transform law practice begins with:
Mindfulness,

Which supports:

our own inner healing,

compassionate self-development

and **commitments** to **heal and**
bring peace to the world.

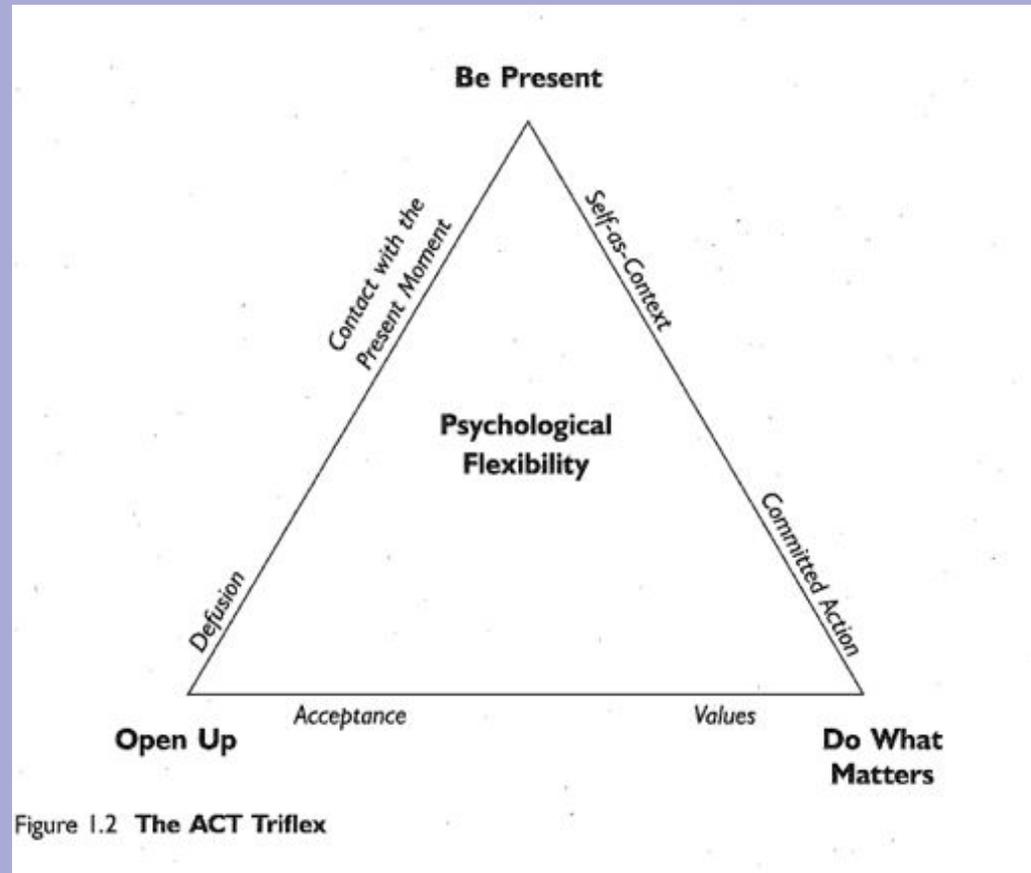

Practicing Mindfulness & Compassion

Mindful, Compassionate Lawyers are Psychologically Flexible and Can Help Others Become so:

Excerpted from:
[Acceptance and Commitment Therapy Made Simple](#), Russ Harris, M.D. (2009)

Practicing Mindfulness & Compassion

“Contemplative Law”:

Integrating Compassion, Peacemaking and Healing

Developing Lawyers in Three Ways, through Three Windows:

• Intra-personal

• Inter-personal

• Inter-systemic

Practicing Mindfulness & Compassion

Window #1: Presence Leads to Self-healing.

Compassionate **self-care**.

Mindfulness-Based Practices have been shown to significantly reduce the stress of people in a wide range of fields.

My own research and personal experience confirm this finding: A full **97% of respondents so far** report finding that contemplative practices help them manage stress.

Practicing Mindfulness & Compassion

Window # 2: Compassionate Lawyering Creates New Possibilities.

Compassionate Relationship healing
and conflict transformation.

Mindfulness-Based Practices help transform conflict through compassion, supporting ethical, relational healing.

Here again, **97% of respondents** in my study self-report that these practices improve their relationships.

Window #3: Real change happens.

Compassionate Re-Invention of Self, Practice and Law Itself.

Mindfulness transforms our understanding of who we are and reshapes our work.

*“It has helped me to see **how interconnected all of life is.** I am beginning to view the law profession as one that can heal relationships instead of one that is adversarial.”*

Mindful Conflict Management and Transformation:
**Compassionate Lawyers Working to Heal and Bring Peace to a
Broken-hearted world.**

Practicing Mindfulness & Compassion

“The cultivation of compassion is no longer a luxury, but a necessity, if our species is to survive.”

- H.H. Dalai Lama

Burnout and Compassion Fatigue

Burnout and Satisfaction With Work-Life Balance Among US Physicians Relative to the General US Population

45.8% of 7288 physician respondents reported at least 1 symptom of burnout.

Physicians in specialties at the front line of care access seem to be at greatest risk. The conclusion: **burnout is more common among physicians** than among other US workers

JAMA Oct 8, 2012, Vol. 172, No. 18

According to various studies, at least **one-third of nurses** who work in high-risk settings may be suffering from compassion fatigue at any given time. There may be a relationship between the symptoms of compassion fatigue and the risk of committing **medical errors, and patients are less satisfied** with the care.

NCI Cancer Bulletin July 24, 2012, Vol. 9, No. 15

Compassion Cultivation Training (CCT) 2012

- 9 weekly 2 hour meetings
- In class lectures, guided meditations, group discussions.
- Daily life practices and recorded guided meditations.
- Monthly follow up class

CCT Six Steps

1. Settling and Focusing the Mind
2. Loving kindness and compassion for a loved one
3. Compassion for oneself
Loving kindness for oneself
4. Embracing shared common humanity
5. Cultivating compassion for others
6. Active Compassion Practice

Our Strategy

- Grow organically
- Bottom up
- Word of mouth
- Cultivate leader champions

Common Humanity

- Seeing the experience of self/others as part of larger human experience
